

Fathy Ali

Software Engineer — Full-Stack .NET — Angular — Blazor

Mansoura, Egypt — +20 100 992 7286 — fathy.ali8ali@gmail.com

linkedin.com/in/fathy-ali-fullstack — github.com/fathyali11 — fathyali11.github.io/Portfolio

Profile

Full-Stack .NET Developer with hands-on experience building production-grade web applications using ASP.NET Core, Angular, Blazor, and Microsoft Azure. Experienced in designing scalable architectures using Clean Architecture and CQRS, implementing real-time features with SignalR, and integrating third-party services including payment gateways and AI APIs. A self-driven developer who has independently designed and deployed multiple production-level projects. Seeking to contribute strong backend, frontend, and cloud engineering skills to a high-impact team.

Technical Skills

- Programming Languages: C#, TypeScript, JavaScript, HTML, CSS
- Backend: ASP.NET Core, ASP.NET MVC, RESTful Web API, SignalR
- Frontend: Angular, Blazor WebAssembly, Tailwind CSS, Bootstrap, jQuery, AJAX
- Databases: Microsoft SQL Server, PostgreSQL, Neon
- Architecture and Practices: OOP, Clean Architecture, CQRS, Real-Time Systems, Background Processing, Unit Testing
- Cloud and DevOps: Azure, CI/CD, Docker, Vercel, MonsterASP
- Tools: Git, GitHub, Postman, GitHub Copilot

Projects

Live Auction System — Real-Time Bidding Platform Dec 2025 – Jan 2026
.NET 10, Blazor WebAssembly, SignalR

Live: [liveauction.runasp.net](#) — GitHub: [fathyali11/LiveAuction](#)

- Engineered a real-time auction platform using Clean Architecture, CQRS with MediatR, and SignalR, ensuring bid consistency and preventing race conditions via database transactions.
- Automated auction finalization and fund transfers using background jobs, and secured user sessions with HTTP interceptors for seamless token handling.

CV Analyzer — AI-Powered Resume Grader Apr 2026
.NET 10, Angular, LLMs, PostgreSQL

Live: [cv-analyzer-ui.vercel.app](#) — GitHub: [CVAnalyzerAPI](#) and [CVAnalyzerUI](#)

- Built an AI-powered resume grading platform using Layered Architecture, extracting PDF text via PdfPig and evaluating against job descriptions using LLMs including Llama 3.3 and Google Gemini.
- Optimized performance using .NET HybridCache to bypass API limits, secured the system with a Sliding Window Rate Limiter, and built a responsive Angular Signals frontend to generate multi-page PDF reports.

WearUp — E-Commerce Platform Aug 2024 – Sep 2024
ASP.NET MVC, ML.NET, Hangfire, Stripe, Google OAuth

Live: [wearup.runasp.net](#) — GitHub: [fathyali11/WearUp](#)

- Designed a scalable e-commerce platform using N-Tier Architecture, integrating ML.NET for AI recommendations, Stripe for payments, and Google OAuth for authentication.

- Automated background tasks using Hangfire, and enhanced security and deployment efficiency through Rate Limiting and CI/CD pipelines on MonsterASP.

Library Management System

Nov 2024 – Apr 2025

.NET Core, SQL Server

GitHub: [fathyali11/LibrarySystemWeb](#)

- Developed a scalable platform for book borrowing, purchasing, and order tracking, integrating secure Payment Gateways and real-time notifications.
- Enhanced performance, stability, and security by implementing Hybrid Caching, Rate Limiting, and Health Checks.

Education

Bachelor of Science in Computer Engineering

Sep 2021 – Sep 2026

Faculty of Engineering, Mansoura University

Mansoura, Egypt

Cumulative Grade: Excellent with Honors

Graduation Project: Excellent with Honors

Training

- Summer Training Program: Web Development Using .NET – Information Technology Institute - ITI

Certifications

- ASP.NET Core 8 Web API: Clean Architecture and Azure Services – Udemy, Mar 2025 – Apr 2025

Languages

Arabic: Native — English: Fluent
